Documentation of Ajax Product Filter

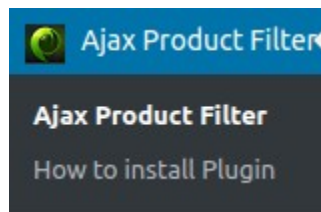

Installation of Ajax Product Filter

Installation

- 1) Install Word Press from http://codex.wordpress.org/Installing_WordPress.
- 2) Upload via FTP: - Unzip the zip archive you have downloaded on your computer. Upload the folder to your server via FTP into the directory plugins on your Word press installation (wp-content → plugins).
- 3) Upload via Word press Admin: - Go to your WordPress admin panel, and then to Plugins. Click on "Add New" and then upload the zip file of the plugin using the "Upload Plugin" button you can find on top of the screen.
- 4) For the plugin to work as it should, Woo Commerce plugin has to be installed and enabled.

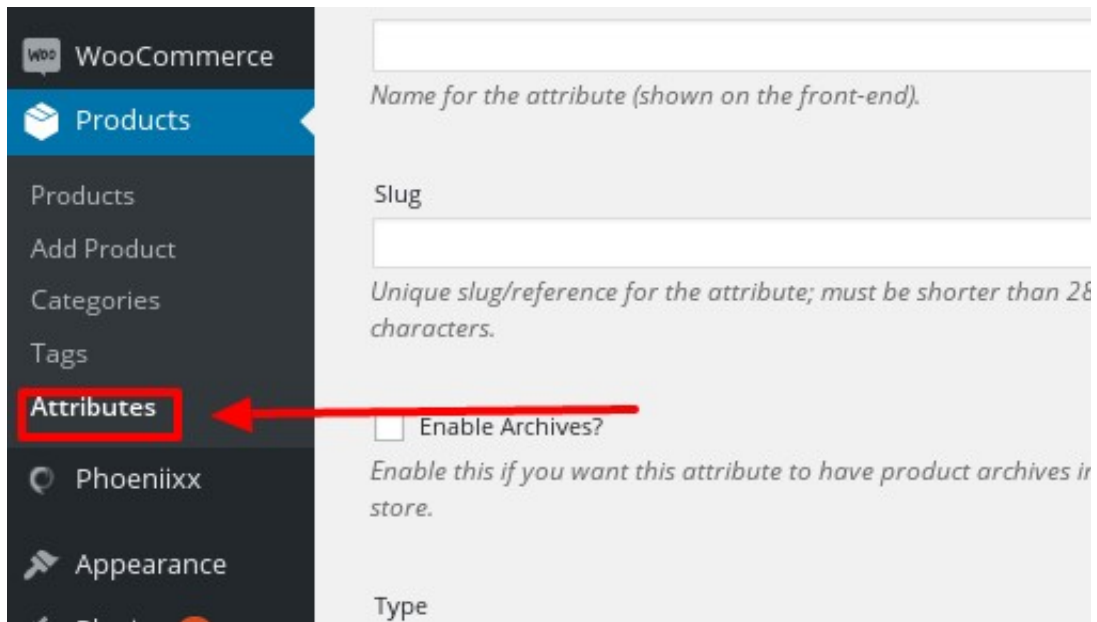

Activation

Once you have uploaded the plugin, activate your plugin in Plugins → Installed plugins. If it has been activated correctly, plugin control panel is available in the tab **Phoenix** → **Ajax Product Filter** in Word Press dashboard.

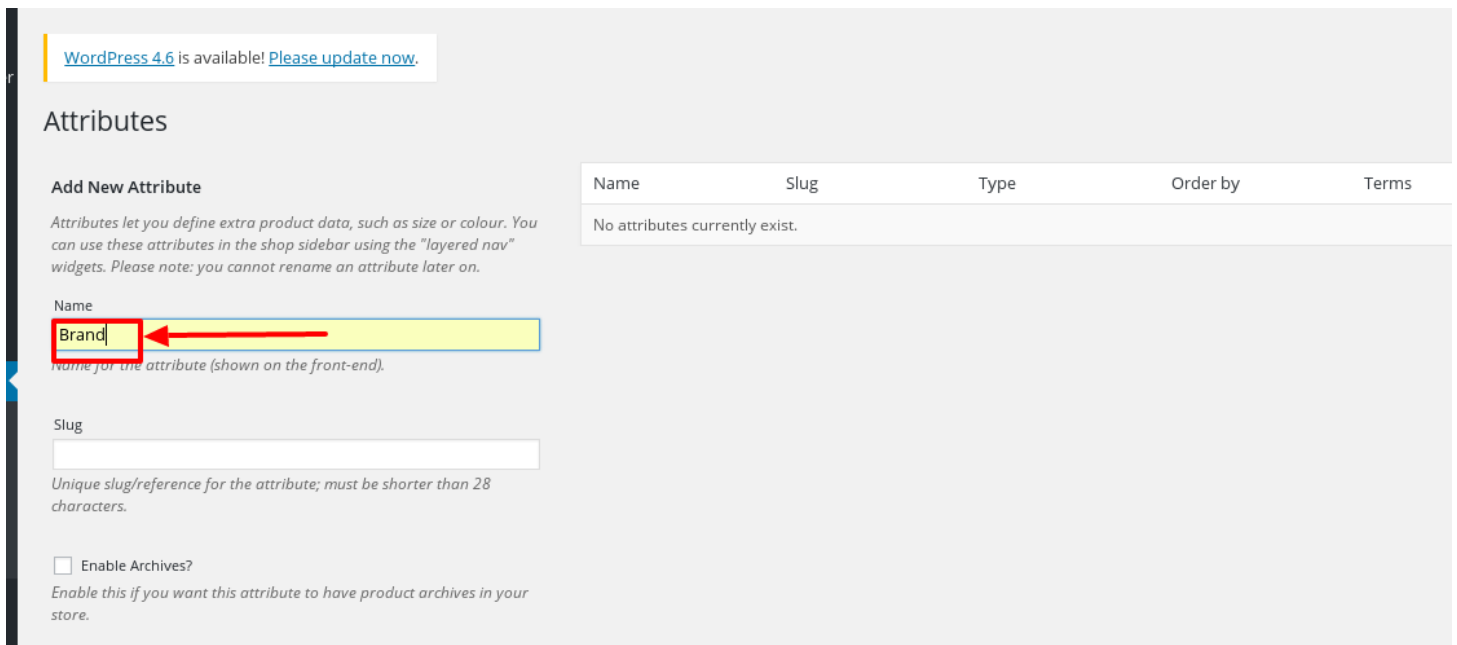

How to Create attribute?

- Go to products tab under that tab select attributes

- Add new attribute. Give the name to the attribute and then click on add attribute button at the bottom.

The screenshot shows the WordPress admin dashboard with the 'Products' menu selected. The 'Add Attribute' button is highlighted with a red box, and a red arrow points to it from the right. The main content area shows the 'Add Attribute' form with the following fields:

- Name:** Brand (highlighted in yellow)
- Slug:** (empty)
- Enable Archives?:**
- Type:** Select (dropdown menu)
- Default sort order:** Custom ordering (dropdown menu)

The 'Add Attribute' button is located at the bottom left of the form area.

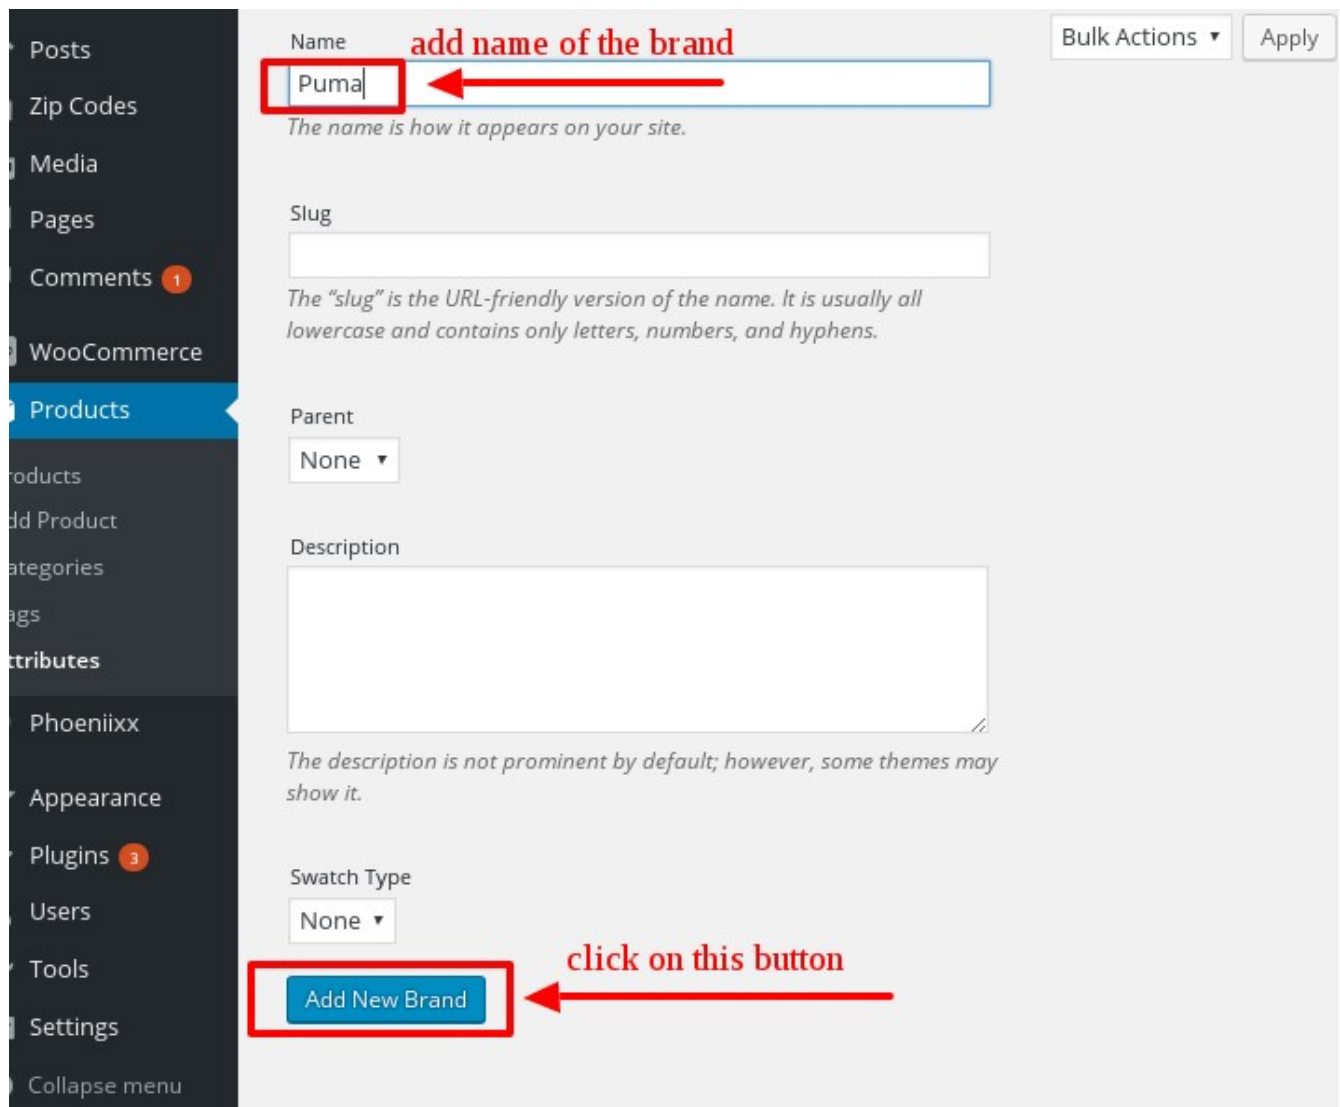

- After creating the attributes, select the configure items option to create terms for the attributes.

The screenshot shows the 'Attributes' section of the WordPress admin dashboard. A table lists the attributes created:

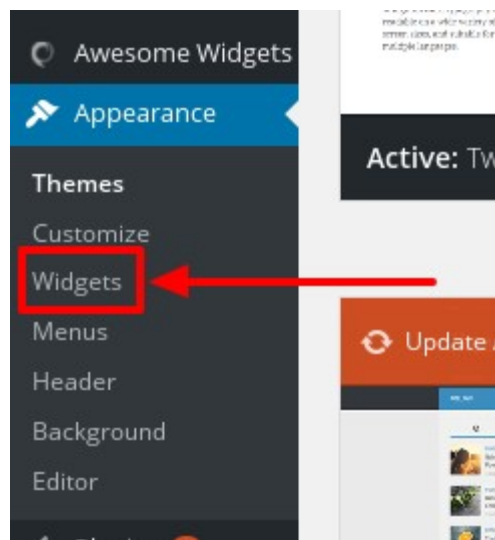

Name	Slug	Type	Order by	Terms
Brand Edit Delete	brand	Select	Custom ordering	-
Pattern	pattern	Select	Custom ordering	-

The 'Configure terms' button (with a gear icon) for the 'Brand' attribute is highlighted with a red box. A red arrow points from the 'Terms' column of the 'Brand' row to this button.

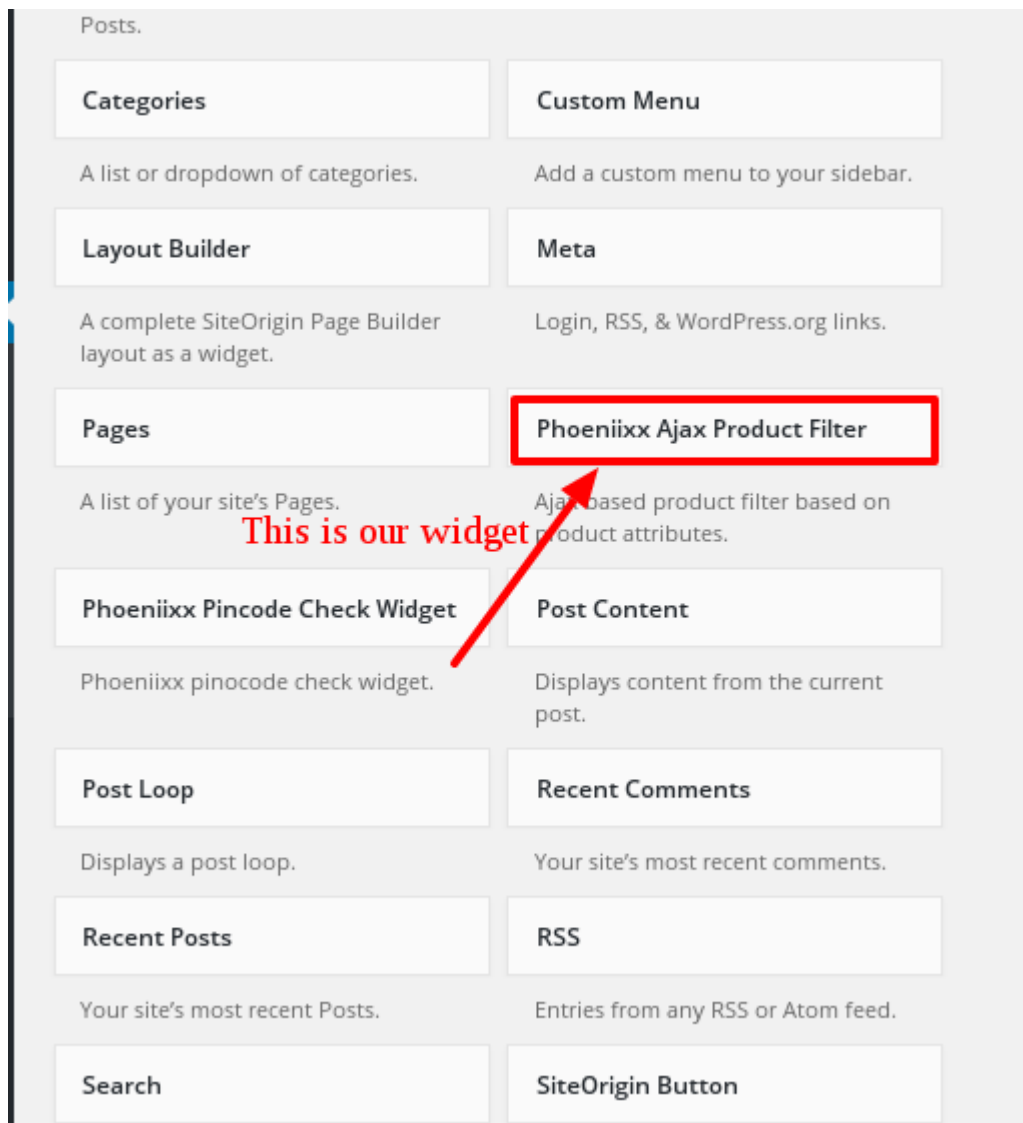

- Now add the terms to the attributes.

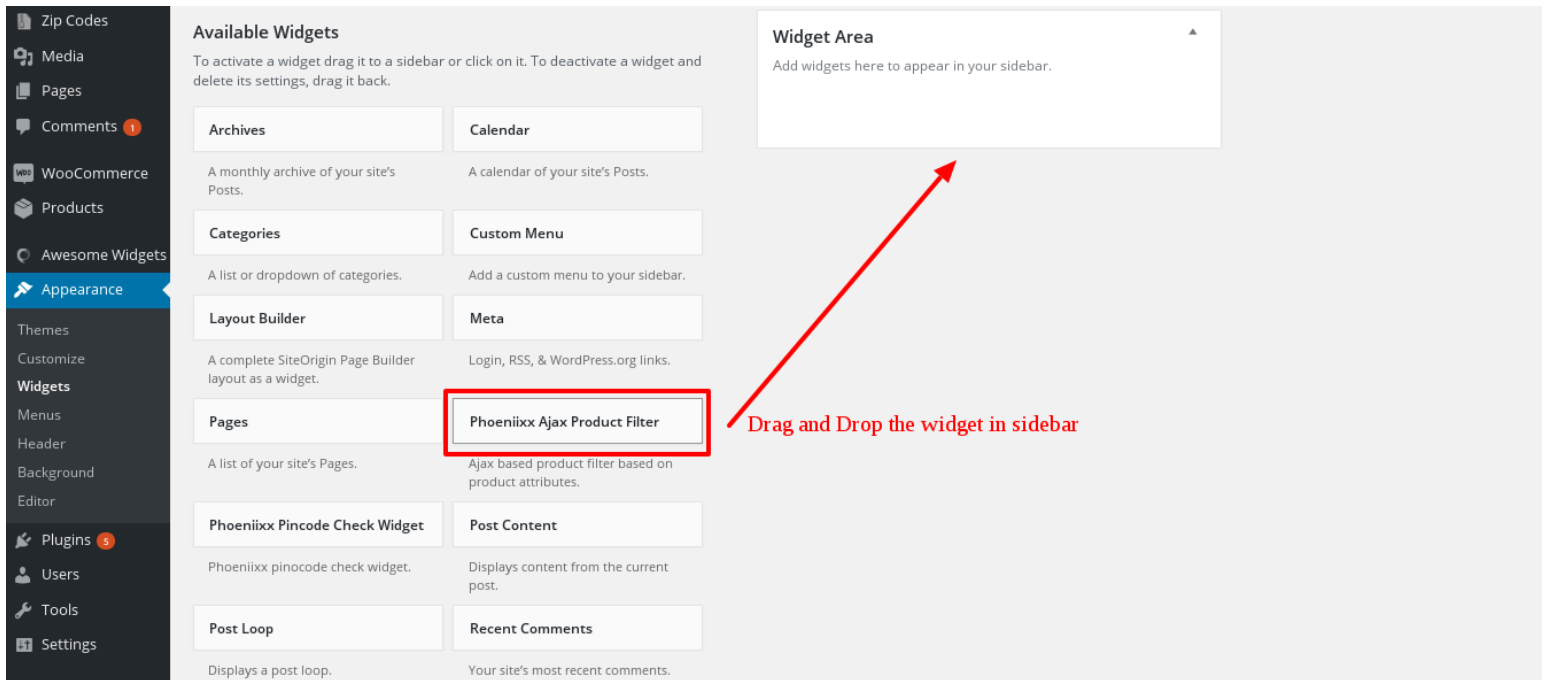

- Once created the attributes, then go to Appearance → Widgets.

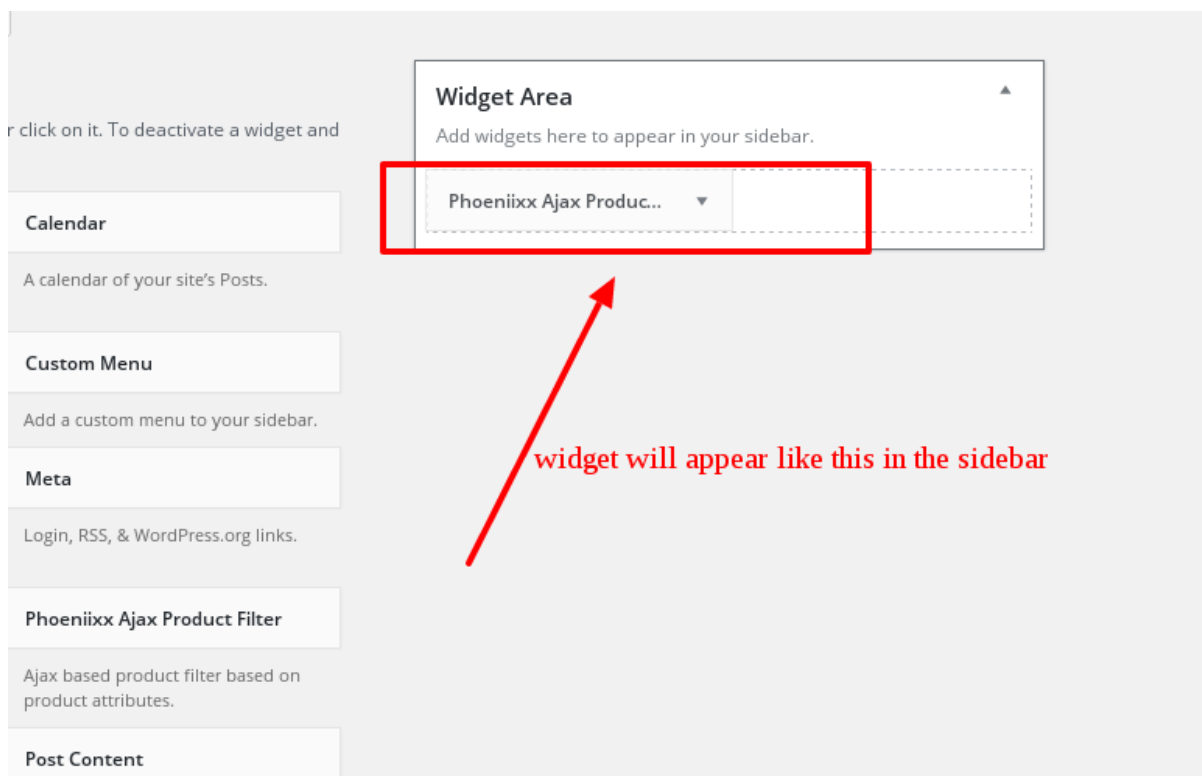

- Then Drag and Drop the widget in the sidebar.

- After drag and drop the widget in sidebar, it will appear like this.

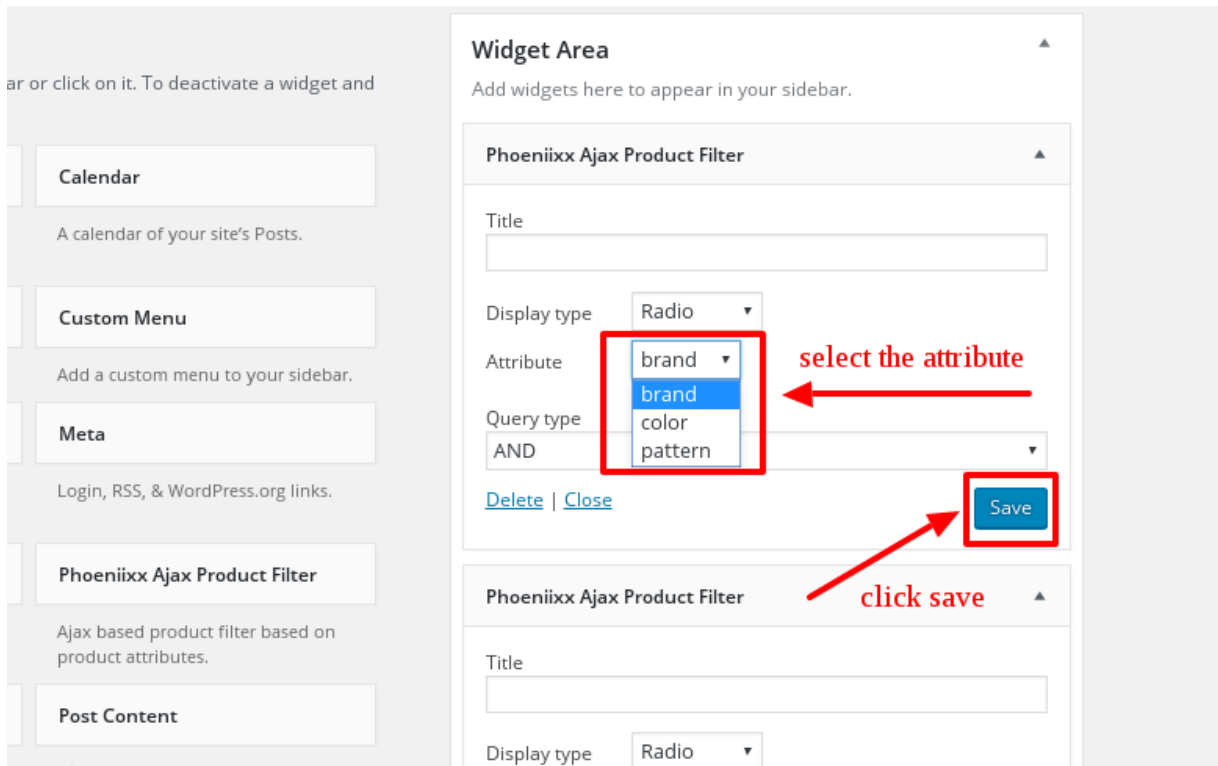

- Give the title.

The screenshot shows the WordPress Widgets interface. On the left, under "Available Widgets", the "Phoenixx Ajax Product Filter" widget is visible. On the right, the "Widget Area" configuration panel is open for this widget. The "Title" field contains the text "Brand", which is highlighted with a red box and a red arrow pointing to it. Below the title field, the "Display type" is set to "Radio", the "Attribute" is set to "brand", and the "Query type" is set to "AND". There are "Delete" and "Close" links and a "Save" button at the bottom of the configuration panel.

- Then select the Display Type for the attributes.

This screenshot shows the same "Widget Area" configuration panel for the "Phoenixx Ajax Product Filter" widget. The "Display type" dropdown menu is open, showing options: "Radio", "Radio", "Link", "Color", "Selectbox", and "Checkbox". The first "Radio" option is highlighted in blue. A red box surrounds the dropdown menu, and a red arrow points to it with the text "select the display type for attributes". The "Attribute" field is set to "brand" and the "Query type" is set to "AND".

- Now select the attribute and click save.

- Final result.
